EV Charger Proposal

Electrical Scope of Work

- Choosing Power Management is crucial for future-proofing your Building installing a four 32Amp EV chargers on a Panel with only 80Amps available
- Electrical installation requires a 40Amp 208V dedicated circuit from the existing electrical room to the designated EV stations in the common area parking, for each charger. With available load sharing, this 160 Amp load will use 80 Amps max.
- Piping, wiring, coring and connections
- ESA permit is included

EV Charger Proposal
